**Comments on the Interagency Science Discussion**  
**Draft IRIS Toxicological Review of Perfluorohexanoic Acid (PFHxA) and Related Salts**  
**February 2023**  
(Date Received March 9, 2023)

---

ATSDR thanks EPA for the opportunity to provide comments on Step 6 of the Draft IRIS Toxicological Review of Perfluorohexanoic Acid (PFHxA) and Related Salts. The document has been much improved since the last review conducted by ATSDR.

ATSDR would like to note that EPA cites the 2018 Draft Toxicological Profile for Perfluoroalkyls throughout the document, but it would be more appropriate to consider citing the updated and final 2021 Toxicological Profile for Perfluoroalkyls.

On page 175, line 38, there is a minor typo. Suggest replacing “that those” with ”than those”.

On page 176, lines 2-3. Selection of an endpoint is a critical decision that warrants more than a personal communication reference. A published citation would be more appropriate.

On page 192, line 12, there is a minor typo. Suggest replacing “waswas” with “was”.
